RE: Experience in Using Tubular Steel Dowel Bar Inserter Equipment

To Whom it May Concern:

In the past two (2) years, Michels Corporation has utilized O-Dowel tubular dowels on Wisconsin Department of Transportation concrete paving projects. We have installed O-Dowel tubular dowels using our Dowel Bar Inserter (DBI) equipment and in Welded Dowel Assemblies. The tubular dowels performed equally to solid steel dowels in terms of equipment handling and installation.

Sincerely,

Ryan Ramthun
General Manager
Michels Concrete Paving Division
